Docket No. EMC-011PUS

Amendments to the Claims:

This listing of the claims will replace all prior versions, and listings, of the claims in the application:

Claims 1-46 (Canceled)

10

13

16

19

- 1 47. (Previously presented) A method of creating a data storage pool, comprising:
- 2 providing information for a plurality of storage resources in response to a user query;
- assigning at least one storage property to selected ones of the plurality of storage resources
 in response to user instructions to define the data storage pool;
- receiving a logical expression to identify respective ones of the storage resources that are available for a requested store operation based upon the storage properties assigned to the selected ones of the storage resources; and
- allocating selected ones of the identified storage resources for the requested store operation.
- 48. (Previously presented) The method according to claim 47, wherein the logical expression
 includes at least one logical operator and at least two storage properties.
- 49. (Previously presented) The method according to claim 48, wherein the logical expression
 includes an amount of storage needed for the requested store operation.
- 50. (Previously presented) The method according to claim 47, further including receiving a new
 property as part of the logical expression.

Docket No. EMC-011PUS

p.5

- 51. (Previously presented) The method according to claim 47, further including assigning a 1
- 2 particular one of the at least one storage properties to a particular type of storage resource.

HP LASERJET FAX

3

- 52. (Previously presented) The method according to claim 47, wherein the plurality of storage 4
- 5 resources includes logical volumes.

6

7 53. (Previously presented) The method according to claim 47, further including receiving a user instruction to identify a storage resource as hand-off storage. 8

9

54. (Previously presented) The method according to claim 47, wherein the user query is 10 11 generated by a storage administrator.

12

13 55. (Previously presented) The method according to claim 47, wherein the logical expression is 14 generated by a database administrator.

15

20

21

22

23 24

- 16 56. (Previously presented) An article, comprising:
- 17 a storage medium having stored thereon instructions that when executed by a machine 18 result in the following:
- 19 providing information for a plurality of storage resources in response to a user query;
 - assigning at least one storage property to selected ones of the plurality of storage resources in response to user instructions to define the data storage pool;
 - receiving a logical expression to identify respective ones of the storage resources that are available for a requested store operation based upon the storage properties assigned to the selected ones of the storage resources; and
- 25 allocating selected ones of the identified storage resources for the requested store 26 operation.

27

57. (Previously presented) The article according to claim 56, wherein the logical expression 28 29 includes at least one logical operator and at least two storage properties.

Docket No. EMC-011PUS

1 58. (Previously presented) The article according to claim 57, wherein the logical expression includes an amount of storage needed for the requested store operation.

HP LASERJET FAX

3

59. (Previously presented) The article according to claim 57, further instructions to include assigning a particular one of the at least one storage properties to a particular type of storage resource.

7

13

14

15

16 17

18

- 8 60. (Previously presented) A system, comprising:
- 9 a processor; and
- a memory coupled to the processor, the memory including instructions that when executed result in the following:
- providing information for a plurality of storage resources in response to a user query;
 - assigning at least one storage property to selected ones of the plurality of storage resources in response to user instructions to define the data storage pool;
 - receiving a logical expression to identify respective ones of the storage resources that are available for a requested store operation based upon the storage properties assigned to the selected ones of the storage resources; and
 - allocating selected ones of the identified storage resources for the requested store operation.

19 20

61. (Previously presented) The system according to claim 60, wherein the logical expression
 includes at least one logical operator and at least two storage properties.

23

62. (Previously presented) The system according to claim 60, wherein the logical expression
 includes an amount of storage needed for the requested store operation.

26

Docket No. EMC-011PUS

- 1 63. (Previously Amended) The system according to claim 60, further including instructions to
- 2 assign a particular one of the at least one storage properties to a particular type of storage
- 3 resource.

4

64. (Previously Presented) The method according to claim 47, further including determining
 which ones of the identified storage resources have preferred characteristics.

7

8 65. (Previously Presented) The method according to claim 64, wherein the preferred characteristics include storage resources having multiple disk spindles.

10

- 11 66. (New) The method according to claim 47, wherein the logical expression includes a storage 12 property not assigned to any of the storage resources, and further including:
- receiving an identification of a first one of the plurality of storage resources having the unassigned storage property; and
- allocating the first one of the storage resources based upon the logical expression.
